Summary

Computer Science undergraduate with strong foundations in Java, Object-Oriented Programming, SQL, Data Structures, and Full-Stack Development. Hands-on experience in enterprise Java application modernization, REST API development, and database integration through industry and academic projects. Passionate about building scalable software solutions and eager to contribute while learning modern technologies in a fast-paced engineering environment.

Technical Skills

- **Programming Languages:** Java, Python, SQL, JavaScript
- **Core CS:** Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
- **Backend Technologies:** Spring Boot, JDBC, REST APIs, JSON
- **Web Technologies:** HTML, CSS, React.js, Node.js, Express.js, Flask
- **Databases:** MySQL, MongoDB, Microsoft SQL Server, Supabase
- **Tools & Platforms:** Git, GitHub, Maven, Linux, Eclipse, VS Code, Postman, Jira
- **Methodologies:** Agile, Scrum

Internships

Product/Application Developer Intern – Lumen Technologies

Feb 2026 – Present

- Modernized enterprise Java application called EON-GC by migrating Java 1.6 to Java 1.8, JBoss to WildFly, and Sybase to Microsoft SQL Server.
- Developed and tested Spring Boot, JDBC, REST APIs, and JSON-based services using Maven and Linux.
- Collaborated using Git/GitHub (PRs), Jira, Agile/Scrum, and integrated Apache Kafka and ActiveMQ.

Java Full Stack Virtual Internship

Apr – Jun 2025

- Built Java-based full-stack applications using JDBC, SQL, and REST APIs.
- Improved database operations through optimized SQL queries and object-oriented design.

Projects

Enterprise Application Modernization (EON-GC & EON Services)

2026 – Present

- Modernized enterprise Java applications by migrating Java 1.6 to Java 1.8, JBoss to WildFly, and Sybase to Microsoft SQL Server.
- Developed Spring Boot, JDBC, REST APIs, and JSON services using Maven and Linux while collaborating through Git/GitHub, Jira, Agile, Kafka, and ActiveMQ.

PlaceMux Recruitment Management System

2026

- Built a full-stack recruitment portal using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT authentication, role-based access, and REST APIs, reducing unauthorized access attempts by 100%.

Event Booking System (Python Full Stack)

2026

- Developed a full-stack event management platform with authentication, CRUD operations, and email notifications.
- Optimized SQL queries and validation logic, eliminating duplicate registrations (100%) and improving response time by approximately 30%.

Achievements

- Selected for the Lumen Technologies internship after successfully clearing the Lumen Hackathon selection process.
- Successfully completed a Full-Stack Development internship, contributing to backend development, REST API implementation, and scalable web application development.

Education

Bachelor of Technology (B.Tech) – Computer Science and Information Technology

2022 – 2026

QIS College of Engineering and Technology (JNTU Kakinada)

CGPA: 8.8/10
